# Career Development in Kurdistan

Tara Mohammed, Founder and Managing Director of Black Ace company for Information Technology Services and Consultancy in Kurdistan talked about career development in Kurdistan and how to improve

#1. introduction

The presentation was about software engineering and developers in Kurdistan how to start and what to do and how to enjoy and pursue your career and software market in general and Kurdistan.

#2. where to start?

The begging is always confusing. How to start and where to aim is always a question. choosing the right field as software engineer depends on your interests, skills values, interests and personality.

#3. setting goals

Setting smart goals and achieving them will make you develop more and reaching a higher level of success your goals have to be Specific, Measurable, Achievable, Relevant, Time-bound because setting goals without achieving them are useless.achieving your goals will make a better candidate in the industry.

#4. enjoy the journy

in the end hard working and trying for a better job beside the love for the job part of it is for the money you earn, but you have to know the limits and go with the flow the hard works are for the time when you are young and full of energy and early ages its the perfect time to practice and work and your should enjoy your time with it at the end everything is for having a better life. the life that you want.
